

# Gustavo Hammerschmidt

Full Stack Developer

## 👤 Profile

Full Stack & Web3 Developer with experience since 2018 and a strong foundation in both front-end and back-end systems. Former manager at Via Nova (2019–2022), I bring a structured, performance-driven mindset to every project—especially in smart contract development, backend APIs, and functional programming.

Motivated by financial freedom and a deep belief in the power of new technologies to reshape daily life, I focus on building modular, efficient systems that scale. Awarded for academic excellence with a top-tier GPA and recognized as one of the best students in my graduating class.

Proficient in Solidity, Rust, React, MongoDB, Tailwind, Next.js, ethers.js, and Hardhat. I craft custom dApps and Web3 tools with clear documentation, maintainable code, and an entrepreneurial vision.

## 💼 Employment History

### Manager at Via Nova, Pato Branco, Pr, Brazil

April 2019 — December 2022

Led the development and maintenance of a robust desktop application for gas station management and sales automation. Oversaw all stages of the product lifecycle—from architecture and UI planning to performance optimization and deployment—ensuring compliance with industry and regulatory standards.

Collaborated closely with engineers and analysts to integrate hardware systems, streamline point-of-sale operations, and automate inventory and fuel tracking. Defined coding standards and implemented best practices for maintainability and performance, with a strong focus on modular and functional programming principles.

Worked with cross-functional teams to gather feedback, prioritize internal tooling enhancements, and address implementation issues. Delivered consistent, scalable releases that improved operational reliability and client satisfaction across multiple gas station networks.

## 🎓 Education

### Bachelor in Computer Science , Pontifícia Universidade Católica do Paraná, PUCPR, Curitiba, PR, Brazil

January 2018 — August 2022

Graduated with high academic performance (2nd highest GPA in the class, IRA 9.1214) and awarded as one of the best students of the cohort. Developed a strong foundation in algorithms, systems programming, and software architecture, with a particular focus on performance-oriented and functional programming paradigms.

## Skills

Software Development

SQL, React.js, Node.js

Complex Problem Solving

Development of Serverless Architecture

Advanced Communication

## Languages

Portuguese

English

German

In 2020, completed a six-month academic exchange at **California State University San Marcos (CSUSM)**, gaining international academic experience and exposure to different approaches in software development and emerging technologies.

Led a final research project focused on NFTs and music, building a prototype for a decentralized marketplace—highlighting a deep interest in Web3 technologies and their real-world applications.
