

Experience

2018 - now | Taiwan

Freelance consultant - Full-stack Blockchain Developer

- ZeFi (YC 2020): an Ethereum smart wallet with multisig & auto-saving to Compound
=> Built the Solidity smart contracts and a JS client library
=> Solidity, OpenZeppelin, Dapper wallet, Truffle
- FutureSwap: Dex for ERC20 futures. Solidity, React
- Unslashed: Dex for staking Insurance, using Gnosis conditional tokens. Solidity, React.
- SenseChat: Mobile chat with integration to EOS. Typescript, React & React Native

2017 - 2018 | UK / Taiwan

LendingBlock (Crypto asset Lending Exchange) - Full-stack Blockchain Developer

- Employee #1
- Built an enterprise trading web app with integration to multiple blockchains
- Worked on Frontend, Backend & Devops
- For Frontend, I used: React, Redux, Saga, D3, Enzyme
- For Backend, I used: Docker, Python, Nodejs, PostgreSQL, Redis, RabbitMQ, Open API
- For Ethereum, I used: Solidity smart contracts, Truffle and Web3
- For Devops, I setup AWS initial infrastructure, Kubernetes and Kops
- Managed Ethereum and Bitcoin clients

2013 - 2017 | Taiwan

Freelance consultant - Full-stack Developer

- Built Web Backends and Frontends in Javascript, Nodejs & React

2010 - 2013 | Hong Kong

Societe Generale (Investment bank) - Financial Engineer

- Create structured products (complex financial products) for institutional investors
- VBA / Excel backtests (simulations of financial performance with historical data)

Blockchain mentoring (2018 - now)

- Teach Ethereum Dapp Development on my [YouTube channel](#) (~3600 subs, 170k views) and [website](#)
- Authored a 82 pages [ebook](#) on Ethereum Dapp development & Solidity

Languages & Frameworks

- Web: Javascript, NodeJS, React, HTML, CSS & Sass
- Blockchain: Solidity, Openzeppelin, Remix, Truffle & Web3
- DB: Redis, Mysql, PostgreSQL
- Human: English, French & Chinese

Education

- Master of Finance - HEC, France
- Master of Engineering - Ecole des Mines, France
