PROFESSIONAL SUMMARY

Innovative full-stack developer specialising in web applications and API integration. Expertise in Python, NodeJS, ReactJS, Rust, Solidity and Java, alongside strong database management skills in SQL and NoSQL. Experienced in software design, system architecture, and DevOps tools including Kubernetes and Docker, while adhering to security best practices. Focused on delivering effective solutions through testing, debugging, and code review. Energetic employee well-versed in strong communication and organisation skills. Seeks solutions to problems and applies extensive analytical knowledge to findings. Adept at multi-tasking, leading group discussions and managing projects.

WORK HISTORY

SAAS IT ENGINEER, 11/2025 - current

Myself , Curitiba, Parana

- Streamlined operations by implementing efficient software solutions.
- Managed cloud-based platforms for enhanced system integration.
- Executed complex IT projects to meet company's strategic objectives.
- Introduced new technology trends to maintain competitive advantage.
- Performed routine maintenance, increasing system performance.
- Monitored system performance using recognised and agreed criteria.
- Executed feasibility studies to inform development of existing and proposed projects.
- Facilitated system expansion, modification and updates.
- Identified current inefficiencies and recommended changing functionality or behaviours to eliminate concerns.
- Outlined needs to meet end user requirements.

SENIOR SOFTWARE ENGINEER, 04/2019 - 10/2025

Via Nova, Pato Branco, Parana

- Designed high-quality software solutions to meet client demands.
- Developed robust applications, enhancing company reputation.
- Improved system performance with advanced coding techniques.
- Optimised database management systems to enhance operational workflows.
- Enhanced existing software systems and legacy platforms.
- Streamlined coding process to improve efficiency.
- Enhanced user experience by developing intuitive interfaces.
- Worked with product managers to define software requirements and project scopes accurately.

- Conducted code reviews, providing constructive feedback to team for improved code quality.
- Facilitated knowledge-sharing sessions, contributing to team skill development and expertise.
- Participated actively in brainstorming sessions resulting in innovative ideas and solutions,.
- Led software development teams for successful project completion.
- Worked closely with cross-functional teams fostering better team collaboration,.

SKILLS

- Full-Stack programming
 - Front-End and back-end development
 - Rust and System's programming
 - Web applications development
 - Python programming
 - NodeJS / ReactJS
 - Java platform
 - Database management
 - SQL / MongoDB / NoSQL Databases
- Software design expertise
 - DevOps toolchain familiarity
 - Kubernetes
 - Docker
 - Security best practices
 - REST API
 - Distributed Systems
 - Blockchain technology

EDUCATION

Pontifícia Universidade Católica do Paraná - PUCPR, Curitiba, Parana, 01/2018 - 08/2022

Bachelor of Science: Computer Science - Marcelino Champagnat Award for best ranked gpa 4.6
